**Subject:** 2015 Annual Domestic Well Monitoring Report Yerington mine Site

Hi Dietrick,

I have questions regarding 2015 Annual Domestic Well Monitoring Report Yerington mine Site in the section 4-Appendices, App D, App D-4 Database ( excel file name : YeringtonDomesticFlat\_20160106). Some of the domestic well data sets under column titled TotalDissolvedID are specified as T (Total) or D (Diluted) while some have been left blank/ not specified. For the data sets left blank: how are we to handle them during data analysis? Should the blanks or unspecified data set be assume to be T and included in the data analysis?

Thanks

Pheona
